

means-end: a line to the goal it serves.

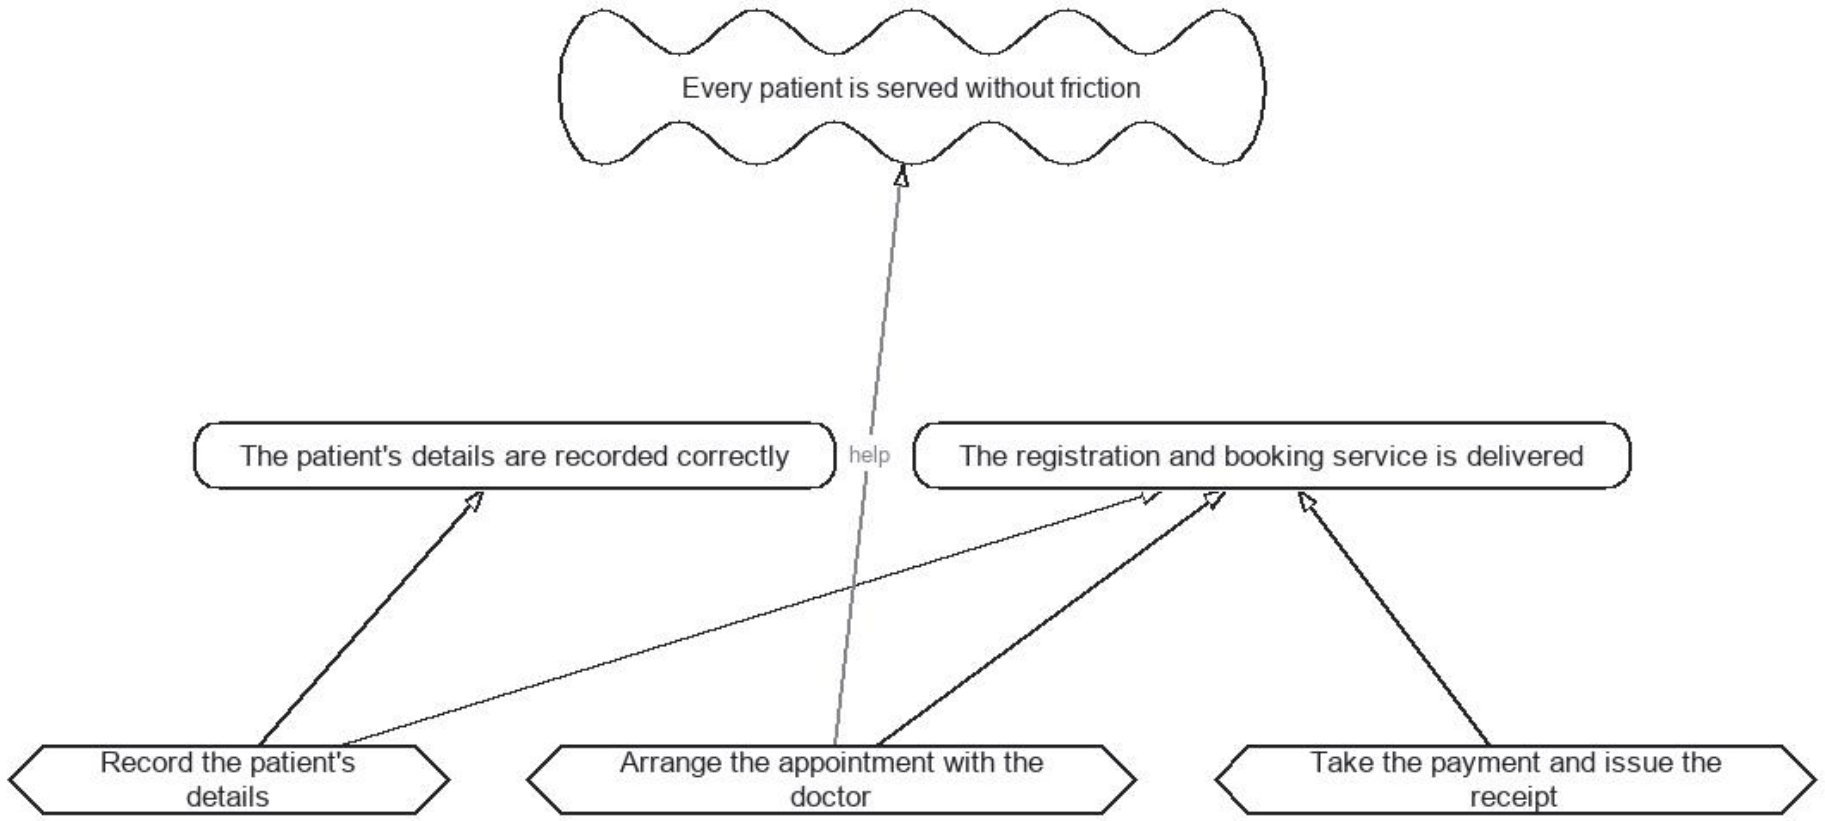

decomposition (AND/OR): the parts of a task.

neededBy: a resource the task needs (circle at the task). contribution: make / help / some+ / unknown / some- / hurt / break.

A dashed element labelled 'not met in this release' is a need the case states and this release does not satisfy: it carries no contribution link.

Receptionst

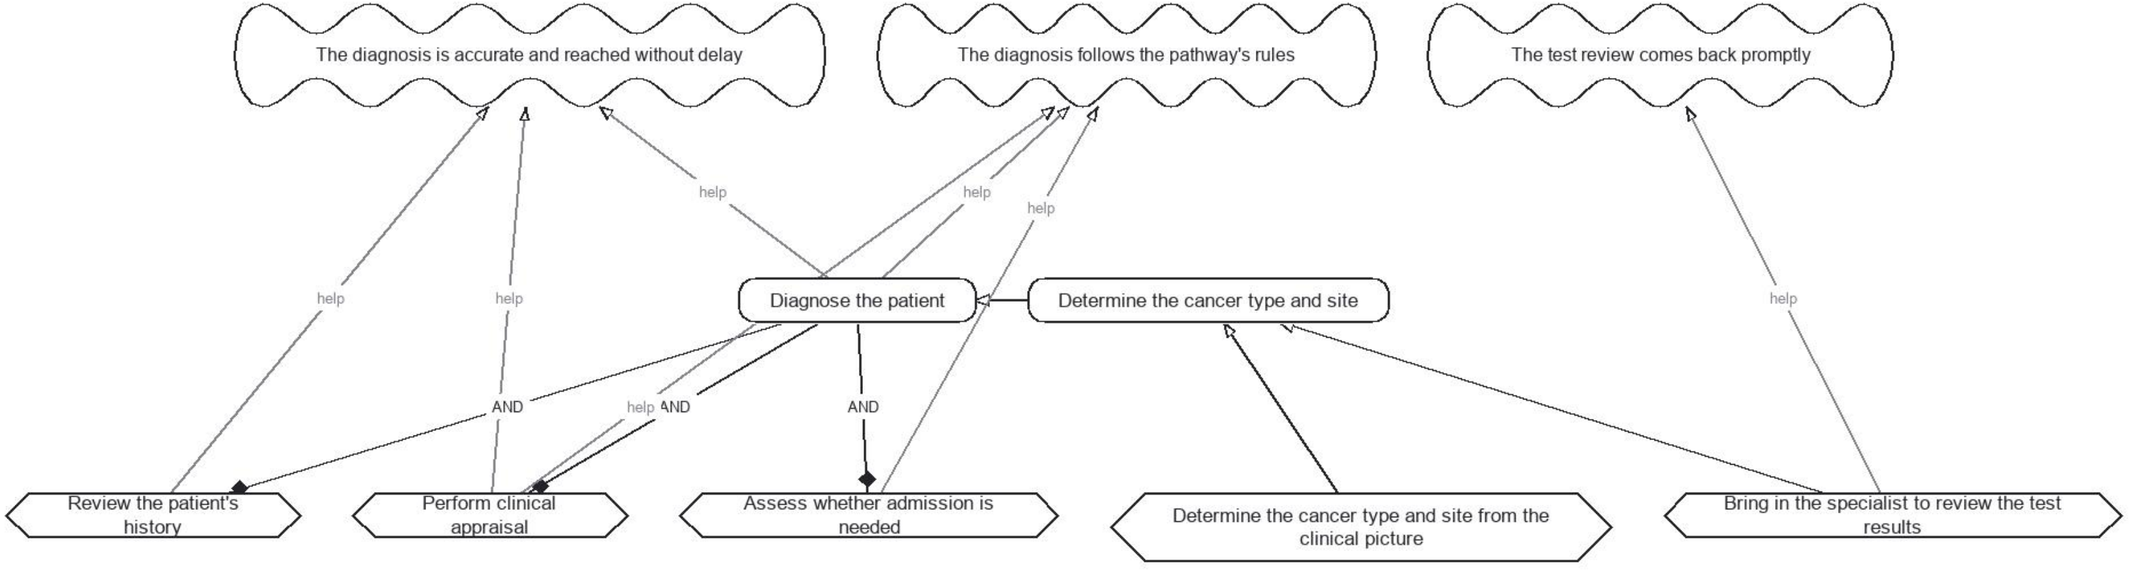

Serve the patient at the front desk: register, book, and take the payment without keeping anyone waiting.

means-end: a line to the goal it serves. decomposition (AND/OR): the parts of a task. neededBy: a resource the task needs (circle at the task). contribution: make / help / some+ / unknown / some- / hurt / break. A dashed element labelled 'not met in this release' is a need the case states and this release does not satisfy: it carries no contribution link.

Doctor

Diagnose the patient, determine the cancer type and site, and bring in the specialist where the test results need that expertise.

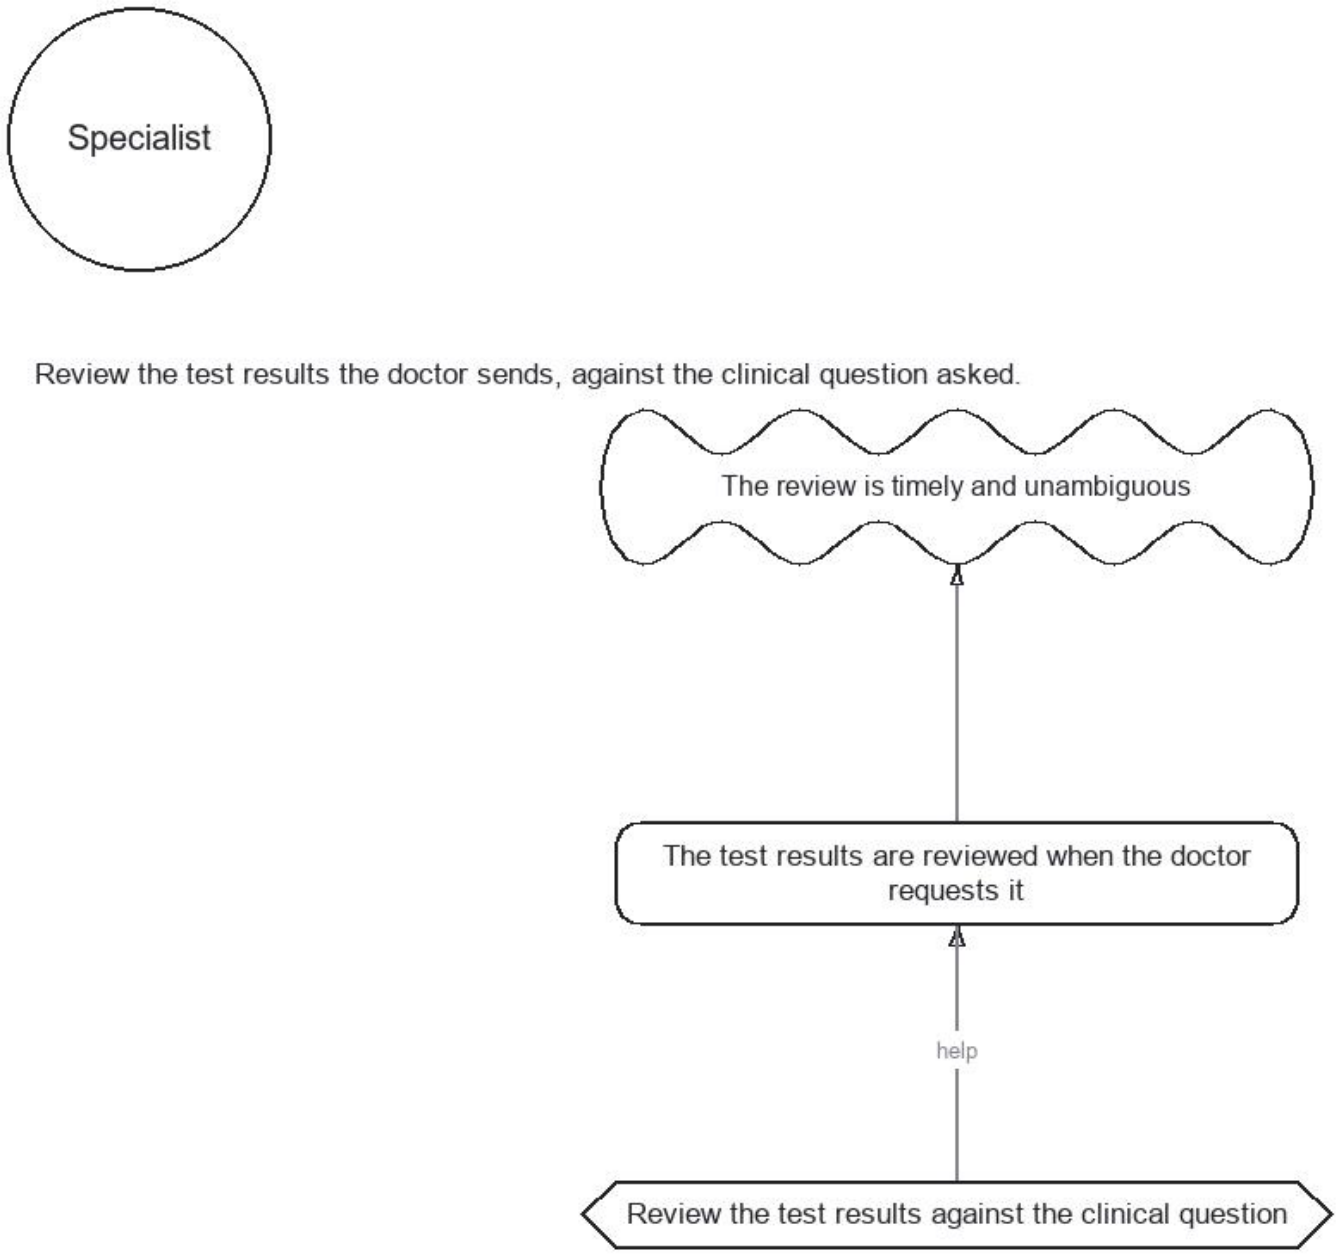

means-end: a line to the goal it serves.
