Medical Secretaries

Referral received

Register and check the referral

Consultants

Review the referral and decide

Assess and authorise the treatment

Outpatient Bookings

Book the appointment and inform the patient

Finance Team

Determine funding and take payment

Treatment Bookings

Book, deliver and review the treatment

Treatment delivered

Hospital Trust

Customer: the patient, referred by a GP or another hospital.

Systems involved: the scheduling, correspondence, treatment and payment services, and the funding organisation. What crosses the hospital boundary: the appointment and the treatment booking, the letters, the treatment itself, the payment and the refund, the funding approval, the missing-information request and its reply, and the patient's contact, cancellation and enquiry.
