Consultants
Review the referral and decide
Assess and authorise the treatment
Medical Secretaries
Referral received
Register and check the referral
Send the clinic letter and escalate delay
Hospital Trust
Customer: the patient, referred by a GP or another hospital.
Systems involved: the scheduling, correspondence, treatment and payment services, and the funding organisation. What crosses the hospital boundary: the appointment and the treatment booking, the letters, the treatment itself, the payment and the refund, the funding approval, the missing-information request and its reply, and the patient's contact, cancellation and enquiry.
